

TABLE 2. Percentages of Branch Points and Total Dendritic Length
in Thirds of the Molecular Layer¹

Thirds	Percent branch points	Percent total dendritic length
Proximal ²	63 ± 2 (31 – 88)	30 ± 1 (11 – 55)
Middle	27 ± 2 (6 – 50)	30 ± 1 (23 – 41)
Distal	10 ± 1 (0 – 28)	40 ± 1 (20 – 52)

¹Values are means ± S.E.M. All 48 neurons were included.

²Branch points and dendritic length in the cell layer were included in the proximal third percentages.
